

# Speaker: Patrik Nellinger & Stefan Schmid

## Profile

---

### **Patrik Nellinger (Solution Owner TDM Global Line/Head of CAM Integration), TDM Systems:**

Since his degree in mechanical engineering, Patrik Nellinger has worked in the area of software development for the automation of production processes for more than 25 years. Initially, he gained extensive practical experience in CAM and offline programming of production machinery and robots. He has worked for TDM Systems in the area of CAM integration, tool data & Tool Lifecycle Management for the last seven years. As a TDM Global Line Solution Owner, he is mainly responsible for creating the roadmap and development planning for TDM Global Line.

### **Stefan Schmid (Head of Competence Team Knowledge Transfer), TDM Systems:**

Stefan Schmid has been with TDM Systems for 25 years and has worked in various areas throughout his career, such as Development, Service and Project Management. There is virtually no one else who has as much comprehensive expertise regarding TDM software as Stefan. Today, he heads the internal TDM Competence team, which facilitates the transfer of knowledge of TDM topics with regards to all service and product issues internally and externally – from software training to Service to the Virtual Academy.
